Tech Sheet: Mysky MS-1

Mysky Light Weight Travel-Cover

Canopy covers help reduce damage to your airplane's upholstery and avionics caused by excessive heat, and they can eliminate problems caused by leaky door and window seals. They keep the windshield and window surfaces clean and help prevent vandalism and theft.

The MySky Canopy Cover is custom designed for each aircraft make and model as well as your aircraft's specific antenna and temperature probe placements. The Canopy Cover is designed to enclose the windshield, side windows and canopy roof. The Canopy Cover also attaches using adjustable "belly straps." When requested, it is sometimes possible to design Canopy covers that can attach to the aircraft fuselage using pop-riveted snap-heads. **The Extended Canopy Cover** extends down to the wing root and will overlap with the Wing Covers, an Engine Cover and/or an Empennage Cover. To insure the most secure fit, high quality shock cord is sewn in the hem of the cover. This chord is also adjustable for tightness.

Each canopy cover is custom sewn and the corners are trimmed to match the colors of the airplane. The airplane's registration number can be imprinted onto both sides of the cover for an additional charge. A duffle bag is included with all canopy covers and can be customized with your registration number and/or logo for an additional charge.

Each canopy cover is made of nylon Silver Laminate and is lined 100% with Micro-fiber. Bruce's Custom Covers developed Silver Laminate especially for aircraft protection. The outer material is a medium weight nylon treated for ultraviolet resistance and anti-static buildup. The inner lining is a Micro-fiber to prevent scratching. Silver Laminate is extremely reflective. Tests show that the cabin interior temperature can be reduced by as much as 25° F. It is water, ice and snow repellent, yet breathable enough to allow moisture to escape from between the cover and the windshield surface. Silver Laminate does not contain hydrocarbon compounds that can harm Plexiglas windshields and acrylic finishes.

The Travel-Cover

is a custom-fit light weight travel Canopy cover intended for limited use during trips away from home when space and weight are restricted. At less than half the weight of the standard design, this polyester/spandex material is lightweight, reflective, and stretchy. Travel Covers will only shed a light mist or morning dew. Travel-Covers are not intended for extended or permanent use outdoors. **Also can be used as a fitted dust cover!**

CURRENT PRODUCTS LIST as of: November 22, 2009
Mysky MS-1

<u>DESCRIPTION</u>	<u>SET OF...</u>	<u>PART NO.</u>	<u>PRICE</u>
CANOPY COVER	1	MSK-000	360.00

Measuring for a Propellor Cover

INSTRUCTIONS: Print Form, Fill Out, Fax to 408/738-2729

Spinner and blade dimensions on propellers vary, even among similar models. Producing a well-made propellor cover depends upon the following measurements.

If you have any questions or problems, please call.

Please Check One:

2-Blade

3-Blade

4-Blade

- A _____ (measure along surface of cone)
- B _____ (measure "straight line" base to tip)
- C _____ (base to top of blade root opening)
- D _____ (provide diameter or circumference)
- E _____ (provide diameter or circumference)
- F _____ (blade root to prop tip)
- G _____ (trailing edge to leading edge)
- H _____ (trailing edge to leading edge)
- J _____ (trailing edge to leading edge)
